

July 14, 2026

To Our Valued Customers,

We are writing to provide an important update on the current Cyclosporiasis Outbreak in the Michigan and Ohio area and across the United States.

We have been following this outbreak closely, including monitoring the International Fresh Produce Association updates.

IFPA Website: [Cyclospora Outbreak 2026: FAQs for Consumers | IFPA](#)

At this time, we have not heard from public health officials directly and are not aware that any of our customers have been contacted by public health officials regarding any suspicion that our product is in any way linked to this outbreak. Therefore, we have no reason to believe that the outbreak is linked to our products and have no reason to question the safety of our products. We cannot speak to the scope of the reported outbreak in Michigan and suggest you contact public health officials.

We are committed to keeping you informed as conditions evolve. Your partnership and the communication you provide to restaurant operators, hospitality groups, and institutional dining teams during this period are greatly appreciated. Should you have questions or require additional support in explaining these quality dynamics to your customers, please contact your sales representative at any time.

Thank you for your continued trust and collaboration.

Evelyn Luquin
